JOURNAL OF GEOCHEMICAL EXPLORATION

VOLUME 47 NOS. 1–3 SPECIAL ISSUE

GEOCHEMICAL EXPLORATION 1991

Edited by

F.W. DICKSON

Department of Geological Sciences, Mackay School of Mines, University of Nevada, Reno, NV 89557-0138, USA

L.C. HSU

Nevada Bureau of Mines and Geology and Department of Geological Sciences, Mackay School of Mines, University of Nevada, Reno, NV 89557-0088, USA

CONTENTS

Preface vii

Methodologies and Techniques in Exploration

Optimization of geological and geochemical surveys
T. Shoji and Y. Nishioka 1

A geochemical atlas of North Carolina, USA
J.C. Reid 11

Geochemical and geophysical signatures at three precious metals exploration targets in Nevada
W.R. Henkle, Jr., T.W. John and C.C. Hyde 29

Regional heavy mineral survey in the exploration for gold using regression: Grenville Province, southwestern Quebec
C. Bellehumeur and M. Jébrak 45

Multielement regional geochemical reconnaissance as an aid to target selection in Irish Caledonian terrains
P.J. O'Connor and C. Reimann 63

Reconnaissance guidelines for gold exploration in Central Alaska
T.D. Light, S.H. Moll, S.W. Bie and G.K. Lee 89

Geochemical patterns from local to global
X. Xie and B. Yin 109

Soil Geochemistry and Biogeochemistry

Diamondiferous kimberlite in Saskatchewan, Canada — a biogeochemical study
C.E. Dunn 131

Gold distribution in lateritic profiles in South America, Africa, and Australia: applications to geochemical exploration in tropical regions
M.L. da Costa 143

Geochemistry of rare-earth elements in surface lateritic rocks and soils from the Maicuru complex, Para, Brazil
R.S. Angélica and M.L. da Costa 165

Distribution and behavior of gold in soils and tills at the Nickel Plate Mine, southern British Columbia, Canada
S.J. Sibbick and W.K. Fletcher 183
The Hatu gold anomaly, Xinjiang-Uygur Autonomous Region, China — testing the hypothesis of aeolian transport of gold
D.B. Smith, P.K. Theobald, S. Shen, T. Ren and Z. Hou 201
Soil and stream sediment geochemical dispersion over the Bell Springs deposit, Hog Ranch Mine, Washoe County, Nevada
S.D. Bussey, P.M. Taufen, B.J. Suchomel and M. Ward 217
Stream Sediment Geochemistry
Stream suspensates for Au and base metal exploration in metavolcanic felsic rocks, eastern Piedmont, Georgia, USA
F.R. Siegel, N.M. Roach, Wen Yang and A. Viterito 235
Distribution and dispersion of gold in point bar and pavement sediments of the Huai Hin Laep, Loei, northeastern Thailand
P. Paopongsawan and W.K. Fletcher 251
Correlations between mineralogical and chemical compositions of fine stream sediments: application to geochemical exploration in tropical rain forests, Bolívar State, Venezuela
T. Tosiani and J. Tapia 269
Regional stream sediment geochemical survey of South Africa
L.S. Labuschagne, R. Holdsworth and T.P. Stone 283
False drainage anomalies (?) in a granite area, Kvalöya in Troms, Norway — a case study
H. Stendal and M.D. Petersen 297
Rock Geochemistry
Geology and geochemical patterns of the Birimian gold deposits, Ghana, West Africa
K. Dzigbodi-Adjimah 305
The epithermal lithogeochemical signature — a persistent characterization of precious metal mineralization at Kursunlu and Örencik, two prospects of very different geology in western Turkey
L.T. Larson and Y.A. Erler 321
Behaviour of rare earth elements in geothermal systems of New Zealand
S. Hopf 333
Supergene oxidation of bonanza Au–Ag veins at the Sleeper Deposit, Nevada, USA: implications for hydrogeochemical exploration in the Great Basin
J.A. Saunders 359
Primary element dispersion patterns in a carbonate-hosted, epithermal, high-grade, Au–Ag telluride system: Mayflower Mine, Madison County, Montana, USA
M.D. Cocker 377
